

### Our Team

## Our Mission

The InfoTech Team at Windham High School aspires to offer all students access to accurate and comprehensive information, robust and meaningful technology, and the opportunity to follow their passions and discover what's possible.

Tammy Lorenzatti  
Technology Integrator

Kristin Chavonelle  
Librarian

Amy Denecker  
Librarian

## Curriculum & Instruction

This year the InfoTechTeam was busy collaborating with teachers on a variety of projects. We created Class Guides for students to use for research projects and lessons. We also continued to attend department meetings in order to work toward more consistency in curriculum and instruction. Click on the buttons to the right to view samples.

## Resources & Technology

The 2021-22 school year focused on integrating all that we learned over the past two COVID years into our return to in-person practices. We implemented Tech Tip Tuesday to keep teachers current with tips, tricks, and technology updates. We also introduced take-home Maker kits and Bento Book Boxes to engage students over the winter and spring breaks. Students and teachers were also excited to be able to return to our interactive Breakout Boxes. For more information about these programs, click on the links to the left.

## Information & Innovation

This school year was about re-connecting and building for the future. We began the year by switching our library management system from Alexandria to Follett Destiny, which allowed us to streamline our catalogs across the district. We also provided enrichment opportunities during Pride block and hosted a staff book fair. In preparation for next year, we created a series of learning modules to educate teachers on inquiry-based learning.

## Professional Development

- [AASL National Conference](#)
- [Right Question Institute at HGSE](#)
- Information Technology Steering Committee
- Cultural Competence Institute (CCI)
- Learning Sciences International (LSI)
- [MASL Spring Symposium](#)
- ACTEM Fall Conference Planning Committee
- MASL Treasurer

## Goals

- Provide [professional development](#) on the research curriculum to a core teacher group
- Collaborate with staff members from departments that we don't often work with
- Build our student book club offerings with silent book clubs and lunch book clubs
- Build connections with librarians throughout the district to improve district-wide library programming
- Work with the District Information Technology Steering Committee to update technology related School Board Policies
- Continue to promote the Makerspace to engage students and teachers in creative and technology-related activities
